THE WIRE GUIDE SYSTEM BY UNILINE

Keep your Outdoor Awnings on Track

You spend a considerable amount of time choosing your outdoor awning fabric. Is it the right colour, is it the right texture, does it add appeal to your home or office? But what about the awning system itself? Introducing The Wire Guide System by Uniline.

Aesthetically appealing and designed for a broad range of applications, the Uniline Wire Guide System is available in Standard or Protéger™ options in a choice of manual or auto operation. Whichever model you choose, the Uniline Wire Guide System is manufactured to exceptional standards, delivering seamless operation, every time. We promise all this with our 5 year industry-leading guarantee.

The Standard Wire Guide

The Standard Wire Guide by Uniline is impeccably constructed right down to the smallest detail.

It features architecturally-designed, highly polished and corrosion-resistant stainless steel fittings and 3.2mm diameter stainless steel cabling which suspends and secures the awning so it's capable of withstanding light to medium-strength winds (this prevents the bottom rail from blowing outwards and potentially causing damage or injury). Multiple bracket sizes and glass filled nylon end caps add extra stability. Available in manual or motorised options.

Introducing the new Protéger™ Wire Guide System from Uniline.

The Protéger™ Wire Guide

Sporting all the brilliant elements of the Standard Wire Guide System, the Protéger™ Wire Guide System also features an aluminium 'cassette' to house the entire awning mechanism resulting in a more streamlined look for your external windows.

Beautifully contemporary, the corrosion-resistant cassette cleverly hides the awning motor serving the dual purpose of protecting and extending the life of your awning fabric whilst it's rolled up and out of use. The cassette is powder coated and has cast aluminium ends for extra durability.

Contact us today & discover why Uniline is a market leader in the supply and

manufacture of systems, components & fabrics to the window furnishings industry.
